A way to access "daikoku" from an Windows PC (Recommended)

(At the time of 2022.10.05)

Softwares to be installed:

·   PuTTY: Remote-logon terminal client software

·   VcXsrv: X server

PuTTY

https://www.putty.org/

PuTTY Japanized version

https://www.ranvis.com/putty

Installation

Unzip the download zip file or 7z file.

Minimum required Settings

·   Session   Host Name (or IP address)

Enter "daikoku.seis.nagoya-u.ac.jp"

·   Connection > Data   Auto-login username   Enter your username.

·   Connection > SSH > X11   Check "☑" Enable X11 forwarding

·   Session   Saved Sessions   Enter "daikoku" and press "Save"

Double-click "daikoku" or press "daikoku", "Open", then you can connect to "daikoku".

VcXsrv

https://sourceforge.net/projects/vcxsrv/

Installation

Search "VcXsrv install", then you can find many sites. Installation is easy.

After installation and setting

·   Start VcXsrv, then start PuTTY.

·   Connect to "daikoku" with your password.

·   When you can successfully login, try below.

-bash-4.2$ xeyes &

If eyes appear on your screen, everything was done well.
